# Smart Accounting
Installation Instructions

Note: Serial Number and Product Registration Code attached
Please keep this document in a safe place.

Smart Accounting
Installation Instructions:

The installation disc contains an autorun setting that should cause the following pop-up to occur when inserted in the CD reader:

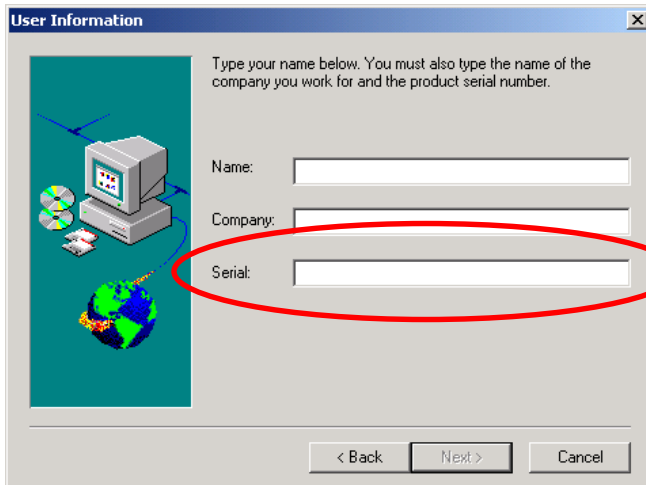

If the pop-up does not occur, you can manually install the available applications by double clicking on the setup.exe file located on the installation disc in their corresponding folders:

(CD drive)\Smart Accounting\setup to install SmartNet Accounting Program - Extended
(CD drive)SDMA\Setup.exe to install SmartDevice Monitor for Admin
(CD drive)\RunTime_Access\setup.exe to install runtime version of Microsoft Access™

NOTE: Do not install runtime version if a full version of Access already exists. It will corrupt the program.

When installing the Smart Accounting application, you will be guided through the process.

It is very important that you enter the correct serial number (8 digits) when prompted. This number will be used later for product registration.
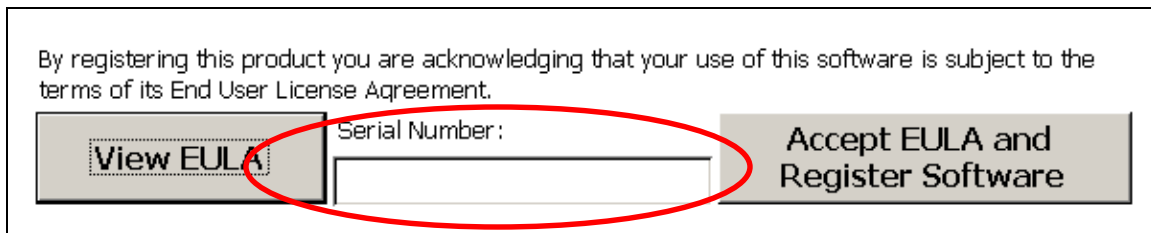

The serial number and registration code can be found just below the installation CD you received.
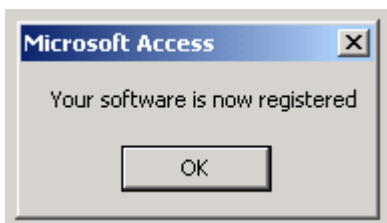

Please save this serial number and registration code in a safe place. It will be required if you need to install the program in the future.

The first time the program is run, you will need to enter the registration code and accept the terms of the End User License Agreement to activate the program.

NOTE: The registration code is CASE SENSITIVE.

If the serial number is not correct or the activation key does not register the product please call for support.

Note: There must be a default printer setup on the machine you are installing Smart Accounting to, prior to doing the first import, to avoid getting an error.
