❖ **G3 Analog Line**

You need to make the following settings for the G3 Analog Line before you connect the machine to a standard G3 analog line.

- When your machine is connected through a PABX, set to **Extension**. If it is connected directly to the telephone network, set to **Outside**.
- **Outside Access No.**

Use this setting if your machine is connected to a PABX that requires you to dial a certain number such as "0" followed by a pause to connect to the outside line. By programming "0" as the PSTN Access Number, a pause will be inserted automatically after the "0" when dialing.
