## Kyocera Mita Wide-Format

When architects and engineers need to bring their ideas and designs to life, they need printers, copiers, or scanners to proof, edit, or approve drafts. They need a system that provides the speed, productivity, image quality, features and options necessary to complete the most demanding projects. But with so many choices, how does one choose?

Kyocera Mita has developed a comprehensive wide-format imaging system portfolio that offers a robust range of wide-format imaging solutions. Plus, it offers the flexibility to add features and capabilities as a user's needs continue to grow.

Businesses that use wide-format systems demand and deserve quality, productivity, and flexible features from their devices. Kyocera Mita rises to the challenge by offering an exceptional line of wide-format devices with features as impressive as their output.

## Kyocera Mita Products

Kyocera Mita's wide-format products produce 600-dpi output with speeds of four and six D size drawings per minute with a low cost of operation as well as copy, print, and scan high quality drawings efficiently and cost-effectively. All products come standard with two rolls of media supply with an option to add a third. The print-centric KM-P4845w, KM-P4850w, KM-S4850w scanner and copy-centric KM-4850w wide-format imaging products are currently available through authorized Kyocera Mita dealers nationwide.

All three models offer a CAD master controller for high-powered, versatile, network-wide, and cross-platform systems. Compatible with both Windows and Mac operating systems, the controller allows users to print from a variety of raster and vector file formats, offering virtually unlimited wide-format imaging flexibility.

Kyocera Mita offers:

**KM-P4845w**—Four D/minute 600-dpi printer for work groups, small companies, and low to mid-volume point of need environments.

**KM-P4850w**—Six D/minute 600-dpi printer with high productivity and low operating costs for workgroups and point of need environments.

**KM-4850w**—Digital copier with optional CAD Master controller that provides copy-print-scan in a surprisingly small footprint at less than 10 square feet of floor space.

**KM-S4850w**—Kyocera Mita also provides a wide-format 600 dpi scanner for the KM-P4850w and the KM-P4845w.

## Partnerships

Kyocera Mita provides user friendly solutions for wide-format printing and scanning needs. Its software solutions enhance document manageability and productivity while reducing operating costs.

Kyocera Mita provides a complete suite of wide-format print management solutions to meet the needs of the most demanding environment.

**Kyocera Mita's Wide-Format Web Manager (KMWWM)** provides a print

spooler, configuration settings, printer status, and scanning via the LAN/WAN.

**Autoprint** provides a simple method for those users that only have a need to print drawings. Up to 256 different Autoprint folders can be established using the filter capability in KMWWM.

**PLP PlotWorks** software, supplied by PLP Digital Systems, is a suite of print management tools. PlotWorks streamlines your workflow by automating repetitive tasks and eliminating errors. Jobs can be viewed before printing, sent to multiple printers, and put on hold to allow time-sensitive documents to be printed immediately.

**Open Archive** systems provide solutions for document management and distribution, electronic archiving, enterprise viewing, indexing, hybrid editing, and conversion to CAD.

## CAD Printing Solutions

**AutoCAD**—Kyocera Mita supplies both ADI drivers for Release 14 and HDI drivers for 2000, 2000i, 2002, and 2004. These drivers allow you to take full advantage of the print capabilities of AutoCAD.

**Windows**—Kyocera Mita ppd supports Windows 95/98/Me/2000/XP/NT and Mac OS 8.6/9.0/9.1. The ppd provides the standard features of a PostScript driver plus support for the architectural, ANSI, and DIN sizes. This driver can be used with Windows-based CAD programs.

**KM-Wide Print Utility**—This utility bypasses the CAD system and allows for easy printing of a wide range of formats, by dragging and dropping files or by traditional Windows add file routines. It provides for PENS and stamps and other important features for controlling the print process.

**Lpr/lpd**—Kyocera Mita wide-format solutions support printing in the Lpr/lpd environments as well as via FTP commands.

## About Kyocera Mita

Kyocera Mita manufactures and markets network-ready digital copiers/ printers, laser printers, color copiers/ printers, digital laser facsimiles, multi-functional, wide-format imaging products and a portfolio of Kyocera Mita-developed and third-party software and network solutions. Kyocera Mita's advanced technology is improving the document management processes to enhance productivity and ease of use with a high-performance, end-to-end digital imaging product line that delivers one of the industry's lowest total costs of ownership (TCO).
