The Savin 7050

The Savin 7050 is what all copiers should be. Fast. Versatile. Easy to use. And, extremely reliable.

Fast

For more than 25 years, Savin copiers have combined the latest technology with high performance and reliability to satisfy the increasingly complex copying needs of the business world.

The Savin 7050 maximizes productivity with speed and convenience. No waiting for your first copy—it's there in just 3.8 seconds. At 45 copies per minute, you won't have to wait for multiple copies either.

The convenient standard document feed eliminates lifting the cover again and again to speed

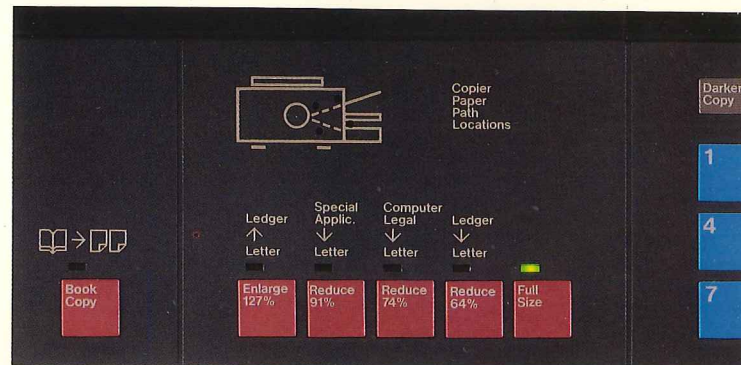

The 7050 does just that. Quickly. Easily. And efficiently.

handling originals. Copy from originals as small as a business card up to a full 11 x 17 ledger sheet in one simple step.

The bottom line?

The 7050's high productivity enables you to complete your copying job quickly and efficiently—so you can get back to focusing on *your* bottom line.

Versatile

The 7050's versatile copying modes will handle just about anything you need—quickly and easily. Its three reduction modes allow you to reduce oversized ledger sheets or computer print-outs to convenient 8½ x 11 copies. The enlargement mode makes it easy to make an original larger for overhead transparencies. The 7050 even lets you copy both pages of an open book without repositioning it.

Easy To Use

The 7050's control panel puts high technology at your fingertips—in plain, everyday English. Its easy to read illuminated display eliminates guesswork by indicating the system status at all times, including reminding you of what you've told the 7050 to do.

The Copy Selected/Copies Made display gives you constant feedback as to where you are in a copy job. And, the Paper Size/Level Indicators show the size and quantity of paper in each tray.

In addition to eliminating guesswork, the 7050 also provides real world convenience. Its copy memory lets you interrupt long jobs to make priority copies. The 7050's auto-print mode allows you to preprogram copy jobs to begin copying *automatically* as soon as the copier is warmed up.

Reliable

The 7050 is the result of 25 years of applying highly reliable copier technology to keeping thousands of Savin customers happy and satisfied.

The 7050's state-of-the-art Microprocessor assures precise process control and reliability in each of its functions, every time—all the time.

The 7050 applies all of Savin's advanced copier technology. The result is a copier that makes short work of your long copying jobs.

The Right Combination for You

A Job Interrupt Memory holds all settings if supplies are needed during a copy run. And, electronic monitoring guarantees consistent copy quality.

The 7050 even helps make problem solving simple with Self Diagnostics. A 15 position Self Diagnostic Display inside the front cover makes locating and solving any problems that might occur—fast and simple.

It's fast.
It's versatile.
It's easy to use.
It's reliable.

The Savin 7050 is designed to think for itself so you won't have to waste your valuable time preparing it to do its job.

The result?

Higher quality. Efficiency. Reliability. And—greater productivity for all of your copying needs.

And, it's ready to grow with your business.

**A quality copier doesn't have to be complicated...
It just has to be a Savin.**

The 7050

Ready to Grow to Meet Your Growing Copy Needs

Automatic Document Feed

The 7050's Automatic Document Feed takes the work out of copying. It feeds up to 25 originals, perfectly positioned and face up. Copies are delivered neatly stacked in the correct sequence.

The Document Feed is easily lifted if you need to copy from books, three dimensional objects or fragile originals.

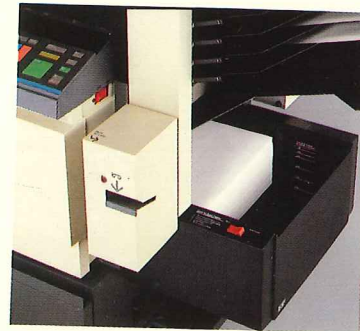

Work-Saving Sorters

The 7050's 10 and 20 Bin Sorters save the time (and tedious work) of hand collating.

Fully integrated and powered by the copier, the sorters can both sort copies to create automatically collated multi-page documents, as well as group unrelated material into individual exit trays. As an added convenience, both sorters include an electric stapler — create finished documents on the spot.

1000 Sheet Tray

The 7050's 1000 Sheet Tray is the perfect assurance of ample paper supply and maximum productivity for high volume copying.

The tray takes either letter or legal size paper, and saves you the time (and aggravation) of having to stop the copier to add paper in the middle of a long run.

The Savin 7050
The quality is built-in to take the effort out.

The Savin 7050
Built to meet all of your copying needs...
Effortlessly.
