

## The Savin 7025 Copier... A Great Performer.

For more than 25 years, Savin copiers have combined the latest technology with high performance and proven reliability to meet the changing needs of the business world.

The 7025 desktop copier is another example of Savin's commitment to product innovation and leadership in the industry.

Savin's 7025 offers you state-of-the-art technology and reliability combined with ease-of-use and the versatility to satisfy all of your copying needs.

The 7025 is compact. You can locate it exactly where the work is. It's versatile. Savin has built in an extraordinary selection of standard features which offer you convenient, easy-to-use per-

formance for a wide range of copying applications. And, if your applications call for more than the standard features, the optional accessories available allow you to customize the 7025 into a variety of copying systems.

The Savin 7025 desktop copier. When it comes to your business needs—it's *A Great Performer*.

## Great Operating Performance at the Touch of a Button

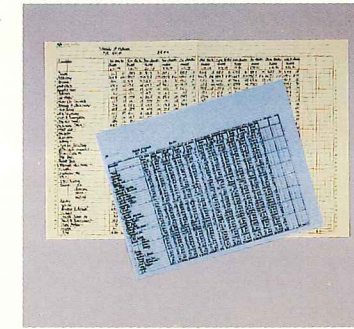

The 7025's touch-sensitive control panel puts great performance at your fingertips. All features are clearly labeled in plain English to assure simple, fast and correct

copying performance—even for the first-time user.

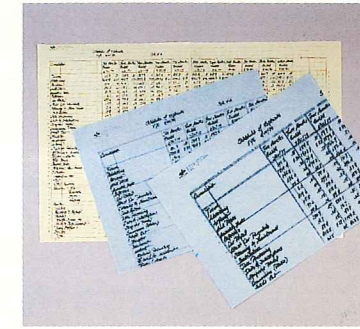

Selection of Copy Quantity, up to 99 copies, paper tray, and reduction or enlargement are all touch

button operations. The copy interrupt allows you to make priority copies during a long run. There is even a message display to indicate copier status.

## Great Performance Built into Standard Features

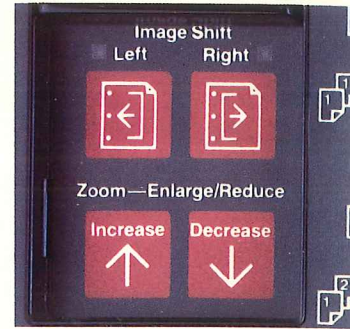

**Zoom Reduction and Enlarge-**ment—65% to 115% magnification range, in 1% increments, insures that you get the exact copy size you need. And, for easy selection of the most common magnifications, the 7025 offers a choice of 5 preset reduction modes, and 1 preset enlargement.

**Book Copy Mode**—allows you to make copies of both pages from an open book or magazine simultaneously. With this feature, an entire book or magazine can be copied in half the time.

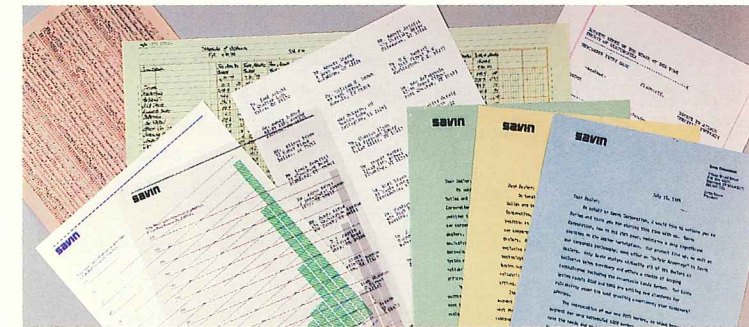

**Continuous Paper Feed**—automatically shifts flow of copy paper from empty to full tray, allowing

you to re-fill empty tray without interrupting the copying operation for faster, more efficient copying.

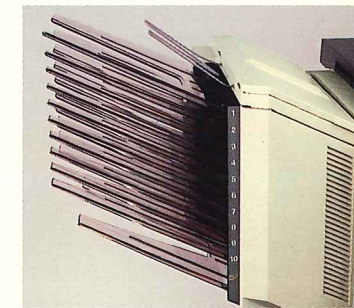

**Automatic Image Shift**—creates a margin on the copy paper to allow you space for three-hole punching or binding without loss of information.

## Great Copying Performance with Versatile Applications

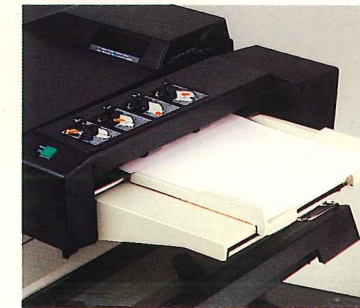

The 7025 makes superb copies on virtually any paper stock, including letterheads, mailing labels, even transparencies for overhead presentations. And, the 7025 delivers consistent copy quality even from hard-to-copy originals.

## And... Great Performing Accessories

**Fully Integrated Sorting**  
The optional 10 Bin Sorter is capable of sorting up to 10 sets of a 50-page document. The sorter eliminates tedious hand collating to make your office more productive.

The optional Semi-Automatic and Automatic Document Feeds allow originals to be fed, copied and returned for highly efficient copying. The document feed lifts easily to copy from books, 3-dimensional objects and over-sized originals.

The optional Large Capacity Paper Tray holds 1000 sheets of paper for long, uninterrupted copying runs. You add paper less frequently, saving valuable time.

Savin Copiers...The Dependable Decision
