

Vanguard Does It Again

Five more Printing United Pinnacle Product Awards

Vanguard Digital Printing Systems is pleased to announce, for the seventh year in a row, they have been honored with the Printing United Alliance's prestigious Pinnacle Product Award (formerly SGIA's Product of the Year award) in multiple printer categories.

Output devices are judged by measuring color charts and then comparing them to industry specifications. "This is the only competition that I know of that reports on the percentage of Adobe RGB a printer can hit" said Dawn Nye, Program Manager for Pinnacle Awards, Printing United Alliance.

The Pinnacle Product Award competition represents the best of the best among commercial hardware and software. Vanguard is honored to continue their string of being awarded *seven years in a row*.

Vanguard VR6D-HS
